

Sagar Ved Bairwa

SENIOR BACKEND ENGINEER · JAVA · SPRING BOOT · DISTRIBUTED SYSTEMS · MICROSERVICES · CLOUD ARCHITECTURE · HIGH SCALE SYSTEMS
☎ +91 9521696998 | ✉ sagarvedverma@gmail.com | 🌐 sagar-ved | 📄 sagarvedverma | 📍 Gurugram, India

“Dynamic back-end engineer with a robust focus on developing and optimizing scalable microservices architectures. Targeting opportunities in high-traffic environments, particularly within the B2B sector, leveraging extensive technical expertise to drive innovation and efficiency.”

Profile Summary

- Backend Engineering Expertise:** Backend Engineer with over 3 years of experience specializing in designing and building scalable microservices for high-traffic B2B travel platforms, ensuring high performance and system reliability.
- Enterprise Backend Development:** Currently working as Senior Software Engineer at Yatra Online, driving back-end engineering initiatives supporting **10K+** daily booking transactions across enterprise-scale systems.
- Microservices Architecture Transformation:** Successfully led migration from monolithic architecture to **12** Spring Boot microservices, reducing deployment cycle time by **40%** and improving scalability and maintainability.
- System Performance & Optimization:** Enhanced back-end system efficiency by implementing distributed workflow, database tuning, and caching strategies, improving performance across high-load production environments.
- Cloud & DevOps Enablement:** Executed cloud-native deployments on GCP using Kubernetes and Docker, enabling zero-downtime deployments and strengthening infrastructure scalability and resilience.
- Production Reliability & Observability:** Strengthened system reliability by implementing structured logging and monitoring using Grafana and Graylog, improving incident detection and production stability through proactive observability practices.

Technical Skills

Languages & Frameworks	: Java, Spring Boot, Spring MVC, Hibernate, REST APIs
Backend Architecture	: Microservices Architecture, Distributed Systems, API Gateway Design, Idempotent Workflows, Transaction Processing
Databases & Storage	: MySQL, MongoDB, Redis, Aerospike
Cloud & DevOps	: Google Cloud Platform (GCP), AWS, Docker, Kubernetes, Linux
Observability & Monitoring	: Grafana, Graylog, Logging, Production Monitoring
Development Tools	: Maven, Gradle, Git, IntelliJ IDEA, Postman, Insomnia

Core Competencies

Scalable System Design	Distributed System Architectures	Cloud Infrastructure Management
System Reliability Engineering	Transaction Processing	Performance Optimization
Microservices Communication Protocols	Data Caching	API Gateway Management
Incident Response and Recovery		

Professional Experience

Yatra Online Limited	Gurugram, India
SENIOR SOFTWARE ENGINEER	December 2024 – Present
★ Led migration of the legacy Corporate Flights monolith into 12 Java/Spring Boot microservices, reducing deployment cycle time by 40% while supporting 10K+ daily booking transactions. ★ Built idempotent distributed booking workflows with Spring Boot, Kafka, and transactional outbox patterns, reducing duplicate booking errors by 95% across reseller and flight services. ★ Tuned MySQL performance through composite indexing, schema normalization, and query plan analysis, improving query efficiency by 30% and reducing P95 latency from 900ms to 630ms. ★ Led GCP migration for 12 back-end services using Docker and Kubernetes on GKE, enabling zero-downtime deployments and reducing infrastructure provisioning time by 50%. ★ Automated CI/CD pipelines with Jenkins and Google Cloud Build for Dockerized Spring Boot services on GKE, reducing release timelines by 35% and improving rollback-safe deployments. ★ Added structured logging, Grafana dashboards, and Graylog monitoring, reducing Mean Time to Detect (MTTD) critical incidents by 40%.	

Yatra Online Limited

BACKEND SOFTWARE ENGINEER

Gurugram, India

July 2023 – December 2024

- ★ Developed **15+** Java/Spring Boot REST APIs for B2B authentication and enterprise wallet transactions, supporting **200+** corporate clients handling **INR 5Cr+** monthly travel bookings and **50K+** daily API requests.
- ★ Integrated Spring Cloud Gateway for Flights, Hotels, and Trains microservices, reducing inter-service latency by **20%** while standardizing authentication and API rate-limiting mechanisms.
- ★ Implemented Redis-based caching solutions for high-frequency booking lookup APIs, reducing database read load by **35%** and improving average response time from **450ms** to **120ms**.
- ★ Enhanced production reliability by implementing Resilience4j circuit breakers, Grafana alerting mechanisms, and automated recovery runbooks, reducing downtime by **15%** across critical booking systems.
- ★ Modernized synchronous workflow into asynchronous Kafka-driven event architectures using Spring Boot async consumers, improving transaction consistency and minimizing cascading failure risks across **5** interconnected services.

Yatra Online Limited

BACKEND ENGINEERING INTERN

Gurugram, India

January 2023 – July 2023

- ★ Developed booking confirmation and itinerary generation modules using Java, Spring Boot, and MySQL, reducing manual processing efforts for **500+** daily corporate travel requests.
- ★ Implemented Aerospike caching solutions for high-read flight search APIs handling **20K+** daily searches, reducing response latency from **750ms** to **180ms** and decreasing database read calls by **60%** during peak usage.
- ★ Resolved **20+** production incidents involving booking reconciliation and payment callback failures through Graylog analysis and MySQL root-cause troubleshooting, contributing to a **10%** improvement in monthly service uptime SLA.

Achievements

- Improved SQL query performance by **30%** through advanced indexing strategies, schema optimization, and query tuning initiatives.
- Reduced production downtime by **15%** through enhanced observability frameworks, proactive alerting, and resilient error-handling mechanisms.
- Delivered GCP migration readiness for **10+** back-end services, strengthening platform scalability, deployment reliability, and cloud infrastructure efficiency.

Education

Indian Institute of Information Technology Vadodara

BACHELOR OF TECHNOLOGY (B.TECH.) IN COMPUTER SCIENCE AND ENGINEERING

Vadodara, Gujarat

2019 - 2023

Certifications

- Fundamentals of Deep Learning
- NDG Linux Unhatched
- SQL – The Complete Introduction to SQL Programming
- Agile Kanban for Software Development Teams

Awards

- **High Achiever Award – Yatra Online Limited (July 2025):** Recognized for exceptional performance and impactful contributions to back-end engineering initiatives.

Personal Details

- Date of Birth : 26th June 2002
- Languages Known : English, Hindi
- Address : Gurgaon
